Academic Program Description Form

Electronics Engineering Department

2025-2026

University Name: University of Nineveh

Faculty/Institute: College of Electronics Engineering

Scientific Department: Department of Electronics Engineering

Academic or Professional Program Name: Bachelor of Science in Electronics Engineering

Final Certificate Name: Bachelor of Science in Electronics Engineering

Academic System: Annual for third and fourth classes

Description Preparation Date: 20-3-2026

File Completion Date: 20-3-2026

Signature: 

Head of Department Name:

Assistant Professor Harith Ahmed
Mohammed

Date:

Signature: 

Scientific Associate Name:

Assistant Professor Bilal Alaa
El-Din Jabr

Date: 6/8/2026

The file is checked by: Yaseer Mohammed Husein

Department of Quality Assurance and University Performance

Date: 6/8/2026

Signature: 

6/8/2026
Approval of the Dean

1. Department Vision

Electronics Engineering should specialize in electronics engineering sciences and be distinguished by its engineering education and scientific research leading to the advancement of knowledge, the development of the profession, and serving the community through partnership with industries, engineering and service institutions, and the graduation of cadres to provide the community with highly qualified cadres.

2. Department Mission

1. Education : Providing specialized engineering educational programs with a precise specialization for undergraduate and graduate studies. Providing a distinguished and recognized educational environment so that its graduates have high professional experience and basic engineering education that enables them to contribute effectively to serving their community and raising the level and progress of their profession. All of this falls within the international standard specifications and is implemented by adopting the ABET quality system in the field of engineering education.
2. Research: Providing a high-level research environment so that its professors, researchers and students can conduct research in basic, applied and exploratory engineering fields and disseminate and apply available and new knowledge in a way that serves the community and the region and interacts with the world.
3. :Leadership Developing leadership capabilities for staff and students, and instilling self-learning, reflection, and deduction abilities in those who possess talent in the field of profession.
4. Community Service : Interacting with the community and engaging in the field of developing the country's industry and engineering institutions, which leads to the social and economic development of the country through consultations, continuous education, and

commitment to industrial problems as research to provide solutions for them.

3. Department Objectives

- A. Graduation of engineers Specialists in the field of engineering sciences Electronics and its applications with high specifications, they have the ability to work in Public and private sector.
- B. Effective contribution to the renaissance and progress of society through holding seminars, conferences and continuous education.
- C. Producing solid applied scientific research in the field of electronic engineering for the purpose of solving industrial and service problems in society.
- D. Strengthening the leadership aspect among members and graduates and instilling a spirit of cooperation among them
- E. Granting postgraduate degrees in the department's various specializations with high specifications
- F. Adopting the approach of updating the curricula and improving performance in activities and events to ensure achieving the desired goals of the department

The goals of the Department of Electronic Engineering

- i. Graduating competent engineers in the field of electronic engineering who possess the ability to identify and analyze problems and develop effective solutions, while being skilled in the use of modern technologies.
- ii. Preparing engineers capable of working collaboratively and professionally with specialists, decision-makers, and others within their professional environment.
- iii. Preparing graduates for admission to graduate programs locally and internationally and for work in research centers.
- iv. Preparing engineers who adhere to professional standards and ethical responsibilities in the practice of electronic engineering.
- v. Effectively contributing to the advancement of society by holding seminars, conferences, and continuing education in the field of electronic engineering, while adopting a continuous improvement approach to all activities and programs.

4. Program Accreditation

None

5. Other external influences

None

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements	4	12	7.8%	Basic
College Requirements	8	36	23.4	Basic
Department Requirements	25	106	68.8	Basic
Summer Training	Third class			
Other				

* This can include notes whether the course is basic or optional.

7. Program Description

Year/Level	Course Code	Course Name	Credit Hours	
			theoretical	practical
First-Bologna Process				
Second - Bologna Process				
the third	EE3301	Electronic II	3	-
the third	EE3201	Digital Signal Processing	3	-
the third	EE3302	Control Engineering	3	-
the third	EE3303	Microprocessors	3	-
	EE3304A	Digital System Design I		
the third	EE3304B	Digital System Design II	3	-
the third	EE3305	Communications	3	-
the third	EE3306	ELECTRONIC INSTRUMENTATION	3	-
the third	EE3307	Laboratory	-	6

Fourth	E E4301	Industrial Electronic	3	-
Fourth	EE4302	DATA TRANSMISSION& COMPUTER ETWORKS	3	-
Fourth	EE4303	Microprocessor & Micro Controller	3	-
Fourth	EE4304	Microelectronics	3	-
Fourth	EE4305	Radiation	3	-
Fourth	EE4306	Computer aided design	3	-
Fourth	EE4307	Engineering Project	1	3
Fourth	EE408	Laboratory	-	6

8. Expected learning outcomes of the program

Cognitive Objectives

1. Graduate qualified engineers who have the knowledge in mathematics, logic and engineering sciences.
2. Graduate engineers who are able to design and conduct experiments as well as analyze the obtained results.

Skill Objectives

1. An ability to design and conduct appropriate experiments, analyze and interpret data, apply quality assurance principles.
2. An ability to communicate effectively, with diverse audiences and across various organizational and managerial levels.

Affective and Value Objectives

1. Graduate engineering who are able to recognize ethical and professional responsibilities in engineering situations, considering the economic, environmental, and societal impacts of engineering solutions.
2. Graduate engineering who are able to recognize the ongoing need for professional development and to effectively locate and apply relevant knowledge.
3. An ability to function effectively as a member or leader of a team, to set goals, plan and meet deadlines.

Adaptive Graduation

1. GO-1 An ability to distinguish, identify, define, formulate, and solve engineering problems by applying principles of engineering, science and mathematics.
2. GO-2 An ability to produce engineering designs that meet desired needs within certain constraints by applying both analysis and synthesis in the design process.

3. GO-3 An ability to create and carry out proper measurement and tests with quality assurance, analyze and interpret results, and utilize engineering judgment to make inferences.
4. GO-4 An ability to skillfully communicate orally with a gathering of people and in writing with various managerial levels.
5. GO-5 An ability to perceive ethical and professional responsibilities in engineering cases and make brilliant judgments taking into account the consequences in worldwide financial, ecological and societal considerations.
6. GO-6 An ability to perceive the continual necessity for professional knowledge growth and how to find, assess, assemble and apply it properly.
7. GO-7 An ability to work adequately on teams and to set up objectives, plan activities, meet due dates, and manage risk and uncertainty.

Affective and Value Objectives

1. Develop students' ability to perform assigned tasks and complete them on time with accuracy and dedication.
2. Develop scientific analytical thinking based on fundamental scientific and logical principles.
3. Enable students to engage in productive dialogue and discussion on issues related to their specialization. Encourage the exchange of views and provide space for others to express different perspectives on the issues raised.

9. Teaching and Learning Strategies

- Continuous follow-up of the academic program and all its activities. Form groups of students and involve them in solving a real problem and discussing the proposed solutions.
- Opening the door to dialogue on some issues and hearing different opinions about the program and its continuous development.
- Focus on the nature of the problems addressed by graduation projects. For the past year, and emphasize on the practical aspects of it, which give the student additional experience that will benefit him later in the field of work when employed.

10. Evaluation methods

- online.
- Submitting laboratory reports.
- Evaluation of the practical implementation of experiments.

- Providing various activities.
- Daily, quarterly, and final exams in person and online.

11.Faculty members

T	Name	Title	General Specialty	Specific Specialty
1	Khaled Khalil Mohammed Jassim	Mr	Electrical Engineering	Electronics and communications
2	Qais Dhnoon, the star of Abdullah Al Ahmed Jassim	Mr	Physics	plasma
3	Ahmed Dhnoon Younis Hussein Al-Naqeeb	assistant professor	Electrical Engineering	Microelectronics
4	Mujahed Fahmy Ibrahim Ismail Al-Azzou	assistant professor	Electrical Engineering	communication
5	Ouss Zuhair Younis Suleiman	assistant professor	Computer Engineering	communication
6	Harith Ahmed Mohammed Ahmed Al-Badrani	assistant professor	Electrical Engineering	Power electronics
7	Ahmed Mohammed Ahmed Salama	assistant professor	Electrical Engineering	communication
8	Hisham Suwadi Hashim	assistant professor	PhD	date
9	Omar Badr Mohammed Khader Al Nuaimi	Teacher	Electrical Engineering	Microelectronics
10	Ihab Essam Daoud Suleiman Al-Rawji	Teacher	Computer Engineering	communication
11	Magic is necessary for Qudori Khader Al-Dulaimi	Teacher	Computer Engineering	Computer and information technology
12	Sarmed Fakhr El-Din Ismail Jassim Al-Mawla	Teacher	Computer Engineering	Digital image analysis and processing
13	Sinan Khaled Mohammed Hassan Shanshal	Teacher	Electrical Engineering	Electronics and communications
14	Nour Talal Mahmoud Aziz Kadawi	Teacher	Electrical Engineering	Electronics and communications

15	Khaled Fazaa Mahmoud Mohammed	Teacher	Electrical Engineering	Electronics and communications
16	Imad Abdel Halim Abdo Ali Al Mulla Khader	Teacher	Electronic engineering	Electronic
17	Abdul Hamid Mohammed Jassim Mohammed Al- Jabouri	Teacher	Electronic engineering	Electronic
18	A whisper of Fawaz Dhnoon Mohammed Al-Raho	Teacher	Electrical Engineering	Solid state
19	Heba Abdel Khaleq Hamdoun Abdel Sawaf	Teacher	Electrical Engineering	Electronics and communications
20	Shawkat Mohammed Younis Mal Allah	Assistant Professor	Electrical Engineering	Power electronics
21	Zahraa Siddiq Yahya Ahmed Al-Sayegh	Assistant Professor	Electrical Engineering	Electronics and communications
22	Amna Idris Kanaan Suleiman Hayo	Assistant Professor	Electrical Engineering	Electronics and communications
23	Names of Nabil Khalil Omar	Assistant Professor	Computer Engineering	Computer and information technology
24	Mohamed Ibrahim Mohamed Ahmed	Assistant Professor	Electrical Engineering	Power electronics
25	Hamam Maher Abdul Shaheen Al-Hamdani	Assistant Professor	Electronic engineering	Electronic
26	Younis Saber Othman Khattab Al-Rifai	Assistant Professor	Computer Engineering	Calculators
27	Harith Hazem Dhnoon Younis	Assistant Professor	Electronic engineering	Electronic
28	Abdul Mohsen Ahmed Hussein Al-Shalawi expresses	Assistant Professor	Electrical Engineering	Electronic
29	Sinan Mahmoud Ayoub Mahmoud Al-Raho	Assistant Professor	Electronic engineering	Electronic
30	Mohammed Saleh Safar Rasool	Assistant Professor	Mechanical Engineering	Thermal engineering
31	Amer Talal Ali Ahmed	Assistant Professor	Electronic engineering	Computer and information technology
32	Hani Mohammed Saleh Salman	Assistant Professor	Mechanical Engineering	Thermal engineering

33	Rasha Walid Hamad	Assistant Professor	Electrical Engineering	Electronics and communications
34	Omar Naguib Saadi	Assistant Professor	Electrical Engineering	Electronics and communications
35	Maysara Abdul Jabbar Qasim	Assistant Professor	Electrical Engineering	Power and machinery
36	Hisham Mohammed Mahmoud	Assistant Professor	Electrical Engineering	Power electronics
37	Hajar Khalil Ibrahim Ahmed	Assistant Professor	Electronic engineering	Electronics
38	Mohammed Saleh Safar Rasool	Assistant Professor	Mechanical Engineering	Thermal engineering

46	Saif El-Din Kamal	nothing	engineering	engineering
47	Ammar Ahmed Abdullah	nothing	engineering	engineering
48	Pearl Hazem Fathallah	nothing	Management and Economics	Management and Economics
49	Idris Mohammed Younis Ahmed	nothing	institute	institute

12. Acceptance Criterion

The admission plan for new students in the department's programs naturally follows the centralized admission plan of the Ministry of Higher Education and Scientific Research and is implemented by the university and college. It can be said that the students enrolled in the department's programs represent the top levels in terms of their grades among applicants to the College of Electronic Engineering, where the principle of differentiation is based on the preparatory school grade and the student's

desire to determine the study program within the programs of the College of Electronic Engineering. Therefore, the nature of the students accepted into the department's programs is that they are distinguished by their academic and intellectual levels and their contributions throughout the program.

13.The most important sources of information about the program

Detailed information about the department's programs can be obtained By visiting the official website of the University of Nineveh and browsing the website of the College of Electronics Engineering:

www.uoninevah.edu.iq

Self-evaluation report and annual department guide within the university and college guide .

14.Program Development Plan

The curriculum is updated annually according to the latest relevant scientific books and labor market requirements, in addition to using the international information network to view the curriculum items of the subject in other leading international universities in this field.

Weekly classes categories for the department

Third Year

- **Course Number: EE3301**
- **Course Name: Electronics II**
- **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**

Course Content: The electronics course covers the area of analog electronic circuit design: Non linear application of op-amp, Filter design theory and approximation, Active filter design, Waveform generator theory and classification, Power amplifier classification.

- **Course Number: EE3201**
- **Course Name: Digital signal processing**
- **Credit Hours: (4,3,0,0) (Units, Theory, Tutorial, Practical)**

Course Content: This course covers the following topics: review of discrete signals and systems, discrete fourier series, discrete fourier transform, convolution and correlation, discrete and fast fourier transform, z- transform, framework for digital filter design, realization of digital filter, finite impulse response digital filter design, infinite impulse response digital filter design

- **Course Number: EE3302**
- **Course Name: Control Eng.**
- **Credit Hours: (6,3,0,0) (Units, Theory, Tutorial, Practical)**

Course Content: This course covers the following topics: I-continuous control system (System representation, Time domain analysis, State space analysis, Stability of system, Frequency response analysis, Design of control system) II-DIGITAL CONTROL SYSTEM (Z-transform, Sampled data control system, Time response analysis, Stability of system).

- **Course Number: EE3303**
- **Course Name: Microprocessor I**
- **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**

Course Content: This course covers the following, Studying the 8086 microprocessor from software point of view, Studying the 8086 microprocessor from hardware point of view.

- **Course Number: EE3304A**
- **Course Name: Digital system design I**
- **Credit Hours: (2,2,1,0) (Units, Theory, Tutorial, Practical)**

Course Content: This course covers the following topics: Standard buses, programmable logic devices, PLC. Inductive proximity sensors: ultrasonic, Optical , Basic Elements of PLC, PLC inputs and outputs interfaces, Ladder programming, PLC Instructions: Latching, Comparisons, Timers, Counters, Sequencers, Shift Registers

- **Course Number: EE3304B**
- **Course Name: Digital system design II**
- **Credit Hours: (2,2,1,0) (Units, Theory, Tutorial, Practical)**
- **Course Content:** Programmable Logic Devices, GAL, SPLD, CPLD, OLMC, ISP, FPGA
- Introduction to VHDL, Modeling flip-flops using VHDL process, Compilation and simulation of VHDL code, Modeling a sequential machine, Variables, Signals and Constants, Arrays

- **Course Number: EE3305**
- **Course Name: Communication**
- **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**

Course Content: the course cover transmission lines, Analog input analog output schemes, Digital input analog output schemes, analog input digital output schemes, Digital input Digital output schemes.

- **Course Number: EE3306**
- **Course Name: Electronic Instrumentation**
- **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**

Course Content: This course covers the following topics: instrumentation errors, transducers, signal conditioning, signal conversion, instrumentation amplifier, analog electronic instruments, digital instruments, and interface buses.

- **Course Number: EE3307**
- **Course Name: Laboratory**
- **Credit Hours: (4,0,0,6) (Units, Theory, Tutorial, Practical)**

Course Content: The principle objective is to ensure that the student have the ability to integrate concepts and achieve the practical works for the different topics he attend in the theoretical classes. Each student should submit a written technical report for each experiment.

Article	Hrs
OP-AMP Applications: inverting, non-inverting amplifier, buffer, summing amplifier, difference amplifier, integrator and differentiator , comparator, sample and hold, zero crossing detector, peak detector, precision diode and fast rectifier, analog computation.	12
Filters: Filter approximations, passive RLC design, active filter design methods (ladder, and cascaded design technique).	9
Oscillators : Barkhausen's criteria for oscillators ; Satisfiability concept Three pole amplifier ; Nyquist criteria ; Stabilizing networks ; frequency compensation and sinusoidal oscillator ; phase shift , Wien bridge , Colpitts , Hartley , Crystal and Tune circuit type oscillator (AF & RF Range).	9
Tuned Amplifier: Introduction to single tuned amplifier ; G.B. response calculations & design ; Cascade amplifier ; Neutralization methods ; Synchronously tuned amplifier ; Elementary treatment of stagger tuned and doubly tuned amplifiers .	9
Audio Frequency Linear Power Amplifiers: Introduction to Class A, B, AB, a ,C operation , Class A – common –emitter power amplifier ; Transformer coupled amplifier ; Class push –pull power amplifier ; Amplifiers using complementary symmetry ; Class C amplifier .	12
Comparators and Converters : Zero crossing detector , Schmitt trigger , Comparator , Voltage limiters and window detector , Clippers and clampers , Peak detector , introduction to A / D and D /A converters and sample and hold circuit .	9
Multivibrators: Astable, monostable, 555 timer, and bistable	12
Integrated Circuits and Devices : Introduction of IC families ; Fabrication Steps and evolving transistor , Diode and Resistor ; capacitors families.	9
Specialized IC Applications : phase locked loops , ICL 8038 function generator , Voltage Controlled Oscillator , XR 2240 programmable timer / counter .	9

Introduction to 16bit Microprocessor: 8086 /8088 Architecture , Machine language, instruction , Internal execution and timing .	6
8086/8088 Family Assembly Language Programming: Data Transfer instructions ;Arithmetic instructions, logical, Shift and rotate instructions ; Branch instructions ; Loop instruction;NOP ; HLT and flag manipulation instructions; Assembler directives.	12
8086 System Connections and Timing : 8086 Hardware overview ; Basic Signal flow on 8086 buses ;Analyzing a minimum mode system; 8086 addressing and address decoding ; 8086 timing parameter .	12
Interrupts and Interrupt Service Procedure : 8086 interrupts and interrupt response ; 8086 interrupt types ; Hardware and software consideration for using interrupt .	12
I/O Programming : Fundamentals I/O consideration ;Programmed and interrupt I/O ; Block transfers and DMA ,I/O design example .	12
Interfacing : Programmable Parallel ports and handshake input/ output ; Interfacing microprocessors to keyboard and display ; D/A converter operation ; Interfacing and applications ;A/D converter ; Specifications and interfacing ; Serial communication interfaces .	12
Parallel I/O and Interfacing Application : Basic interfacing concepts 8255 Program Peripheral Interface ; Interfacing displays ; Keyboards; , 8279 Programmable keyboard interface; , interfacing memory ; Memory ; Mapped I/O .	12
General Purpose Programmable Peripheral Devices: 8253 Programmable Timer 8257 controller , 8259 interrupt controller .	12
Total	90

The principal objective is to ensure that students have a good quality capstone design & experience to integrate concepts from a range of classes in the core. The students are to apply modern engineering practices and techniques. Each student should submit a written technical report for each experiment. The experiments cover the related topics in electronic circuit analysis, communication system and microprocessor technology.

Weekly classes categories for the department

Fourth Year

- **Course Number: EE4301**
 - **Course Name: Industrial Electronic**
 - **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**
 - Course Content:** This course cover the power semiconductor devices, Phase control converters, Thyristor commutation techniques, Inverters, PWM and speed control.
-
- **Course Number: EE4302**
 - **Course Name: Data Transmission and Computer Networks**
 - **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**
 - Course Content:** Definitions and standards, Transmission media, OSI and TCP/IP models, Connecting devices. Data link control and data link protocols, LAN technologies, WLAN standards and devices, WAN and Wireless WAN.
-
- **Course Number: EE4309**
 - **Course Name: Microprocessor II**
 - **Credit Hours: (2,2,1,0) (Units, Theory, Tutorial, Practical)**
 - Course Content:** Introduction to Advanced Microprocessors, The 80386 and 80486 Microprocessor, Assembly language and Programming,
-
- **Course Number: EE4303**
 - **Course Name: Microcontroller**
 - **Credit Hours: (2,2,1,0) (Units, Theory, Tutorial, Practical)**
 - Course Content:** Microprocessors and Microcontrollers, The MCS-51 Architecture, Basic Assembly Language Programming Concept, An MCS-51 Microcontroller Design
-
- **Course Number: EE4304**
 - **Course Name: Microelectronics**
 - **Credit Hours: (6,3,0,0) (Units, Theory, Tutorial, Practical)**
 - Course Content:** The microelectronics course covers the area of integrated circuit design. The fabrication of electronic devices, and design and analysis of analog and digital integrated circuits.

- **Course Number: EE4305**
 - **Course Name: Radiation**
 - **Credit Hours: (2,2,1,0) (Units, Theory, Tutorial, Practical)**
- Course Content:** Give the students an overview of microwave technology and introduction to Microwave devices.

- **Course Number: EE4308**
- **Course Name: Antenna and Propagation**
- **Credit Hours: (2,2,1,0) (Units, Theory, Tutorial, Practical)**
- **Course Content:**Antenna Theory (Principles of radiation and equivalent circuit)
, Dipole antenna, Array antenna, Reflector Antenna (Parabolic antenna), Ground wave propagation (Direct and Reflected), Ionospheric Propagation , Radar theory (Circuits and equations)

- **Course Number: EE4306**
 - **Course Name: Computer aided design**
 - **Credit Hours: (4,2,1,0) (Units, Theory, Tutorial, Practical)**
- Course Content:** This course covers the following topics: Numerical solution for Linear and nonlinear circuit ,DC and AC matrix analysis ,two port analysis ,graph theory , Simulation ,State variable analysis, Sensitivity, Optimization, CAD for integrated circuits, Genetic Algorithm .

- **Course Number: EE4201**
 - **Course Name: Engineering Project**
 - **Credit Hours: (4,1,0,3) (Units, Theory, Tutorial, Practical)**
- Course Content:** Collaboration team work in research environment is expected including extensive interaction with other students. Each group should submit a written report and should attend the final oral examination.

- **Course Number: EE4307**
 - **Course Name: Laboratory**
 - **Credit Hours: (4,0,0,6) (Units, Theory, Tutorial, Practical)**
- Course Content:** The principle objective is to ensure that the student have the ability to integrate concepts and achieve the practical works for the different topics he attend in the theoretical classes. Each student should submit a written technical report for each experiment.

Text book:
1: “Microwave Circuits and devices” by Liao
2: Microwave Engineering” by Pozar

University Of Ninevah
College of Electronics Engineering
Electronic Engineering Department

Class	Fourth			Theory :	2Hrs/wk
Subject	Data Transmission & Computer Networks			Tutorial	1 Hrs/wk
Code	EE4302	Unit	4	Practical	Hrs/wk

Article	Hrs
Introduction and Definitions: Data Communication, Networks, Protocols, Standards, and Standard organizations.	3
BASIC CONCEPTS:- Line configuration, Topology, Categories of networks.	6
Transmission Media: Electromagnetic spectrum, Guided media: Unshielded Twisted Pair (UTP) Cable, Shielded Twisted Pair (STP) Cable, Coaxial Cable, Optical Fiber, Unguided media: Radio Transmission, Microwave Transmission, Satellite Microwave.	9
Interfaces and Modems: Data transmission: parallel, serial, synchronous and asynchronous, DTE-DCE interface and standards, Modems.	6
The OSI and TCP/IP Models	6
Networking and Internetworking Devices: Networking devices: NICs, Hubs, Repeaters, Bridges and Switches, Internetworking devices: Router and Gateways.	6
Data Link Control: Link Discipline, Flow control, Error control.	6
Data Link Protocols: Asynchronous protocols, Synchronous protocols.	3
Local area Network (LAN): Ethernet, Token Bus, project 802, Token Ring, FDDI.	12
TCP/IP Model and Protocols	9
Wireless LAN (WLAN): Introduction and history of (WLANs), Standardization and frequency bands, IEEE 802.11 standard, WIFI, WIMAX, Bluetooth.	9
Wide Area Network (WAN)	6
Wireless WAN	6
Internet Working and Internet	3
Total	90

Text book:
1: "Introduction to Data Comm. And Networking", By Pehrouz Forouzan.
2: "Computer Networks and Internets", Douglas By E. Comer (4 th edition)

University Of Ninevah
College of Electronics Engineering
Electronic Engineering Department

Class	Fourth			Theory :	2 Hrs/wk
Subject	Industrial Electronic			Tutorial	1 Hrs/wk
Code	EE4301	Unit	4	Practical	Hrs/wk

Article	Hrs
Introduction : Scope of power electronics , power converter specification . Power Semiconductor Devices : Thyristor families , V-I characteristics of SCR , Triac , GTO , Diac , Source of thyristor triggering , turn On \ turn Off characteristic and Gate triggering requirements, series/parallel operation, device ratings.	12
Power Transistor devices: Basic structure and V-I characteristics of power MOSFET,IGBT,SIT. Switching characteristic, Gate/Base drive circuits, Safe operating area, di/dt / dv/dt limitation, series/parallel operation, ratings.	12
Phase Control Converters: Signal phase central taped transformer connection , half controlled and fully controlled Bridge configuration , three phase half controlled Bridge converters , Use of flywheeling diode operation with resistive , inductive and Back EMF load , line commutated inverter , effect of source inductance on converter performance , power factor , ripple factor calculation , firing scheme , linear alpha and cosine angle control , application of D.C motor speed control , regulated power supply , battery charger	18
Thyristor Commutation Techniques: Natural commutation , Force commutation , Voltage / Current commutation , DC chopper , Principle of Voltage control , analysis of Morgan chopper circuit , Johns chopper circuit, regenerative chopper circuit .	15
Inverters : Single phase series and parallel inverters , classification of CSI and VSI inverters , single phase and three phase inverter circuit , methods of voltage controlled inverter circuits , comparison of thyristor and transistor, based inverters, application to speed control of AC motors , uninterrupted power supply , induction melting , heating furnaces .	15
Industrial Applications: DC Motor Control, Induction Motor Control, Pulse width Modulation & Speed Control, Static Relays & Contactors.	12

Electronic Engineering Department

Class	Fourth			Theory :	2 Hrs/wk
Subject	Microcontroller			Tutorial	1 Hrs/wk
Code	EE4303	Unit	2	Practical	Hrs/wk

Article	Hrs
Microprocessors and Microcontrollers : Comparing Microprocessors and Microcontrollers , The Z80 and MCS 51 , Microcontroller survey .	6
Microprocessor & Micro Controller : Comparing Microprocessors and Microcontrollers, , Micro Controller survey.	9

The MCS-51Architecture :Introduction, MCS-51 family microcontrollers hardware, Input/output pin, ports and circuits, External memory interfacing, counter, timer, serial data input/output, Interrupts.	9
Basic Assembly Language Programming Concept : Addressing mode, External data, move, Code memory read – only data moves, Push and Pop opcodes, Data Exchanges, Logical operations, Arithmetic operations, Branching Instructions, Interrupts and Returns.	12
An MCS-51 Microcontroller Design :Microcontroller Specification, External memory and Memory space Decoding, Expanding I/O , Memory map I/O , Memory address decoding, Testing the Design, Lookup table for the 8051, Serial data Transmission.	9
Total	45

Text book:
1: “The 80386-80486 and Pentium processor” By Walter A. Tribel;
2: “The Intel Microprocessors “ By Barry B. Bery
3: “The 8051 micro-controller” By I. Scott Mackenzie.

Class	Fourth	Theory :	3 Hrs/wk
Subject	Microelectronics	Tutorial	Hrs/wk
Code	EE4304	Unit	6
		Practical	Hrs/wk

Article	Hrs
Semiconductor Fundamental :Energy band model of solid, intrinsic and extrinsic semiconductor, free carrier density in semiconductor, carrier concentration and Fermi level. Carrier transport and recombination, carrier diffusion, the drift current, Hall effect. MIS, MOS, Schottky barriers, magnetic effect, bipolar junction, p-n junction, FET.	6
IC fabrication processes :Crystal growth, diffusion, doping, evaporations, and photo masking, Ion implementation, Thin and thick film fabrication, sputtering, mounting, package, and hybrid integrated circuits.	12
LSI and VLSI Design and Application :Discrete device design, bipolar transistor fundamental, technology, and miniaturization. Linear I.C's: fabrication, and general consideration. Current sources,. LSI oriented bipolar technology. Logic Families based on bipolar transistor (RTL, DTL, TTL, ECL, TRL, I ² L). TTL gate circuit analysis. Metal-Semiconductor junction, Metal-Oxide Semiconductor junction. FET theory and analysis.	18
MOS Transistor Fundamentals and MOS I.C Technology :MOS capacitor, static characteristics of the MOS transistor, MOS device fabrication. MOSFET's. Logic circuits based on MOSFET, PMOS, NMOS, CMOS,DMOS, SOS, VMOS. NMOS inverter and gate circuit analysis. CMOS inverter and gate circuit analysis. Charge-coupled devices and non-volatile memory devices, software applications.	18
ASIC Design methodologies and system design consideration	9
LCA, Standard cell, Gate array, Structured array]	9

Full-Custom and Semi-Custom Design :Design motivations; design either discrete component, full-custom and semi-custom design approaches.		9
Field programmable gate arrays FPGA and Field programmable analog arrays FPGA		9
Total		90
